Availability of 6" water mains

Rural Water District #3 of Seminole County does not have any 6" water mains available to supply fire suppression systems.

All fire hydrants in the District are set up as fill only and the Fire Department does not direct connect to the hydrants during firefighting operations. The District does not intend to install additional fire hydrants at land owner request.

We do not issue address specific letters for the State Fire Marshal's office regarding water line sizes or the availability of fire hydrants.

If you have questions please call the office at 405-944-5952.
